

Introducing IRS Direct Tax Return Verifications

Don't Slow Down Your Loan Waiting For Your IRS Transcripts

Avantus' new **IRS Direct** Tax Return Verification (TRV) Service is the fastest and easiest way to verify borrower income available on the market today. With more lenders requiring 4506-T tax transcripts on every loan and faster turnaround, time lost processing transcripts manually could mean fewer closed loans.

The Avantus **IRS Direct** TRV Service completely automates 4506-T processing to verify income. Avantus customers can process each request online through the Avantus online ordering system. The IRS Direct Service tracks each transcript in real-time from submission of the 4506-T request through the delivery and viewing of the finished report. You will always know where your requests are in the process, helping you get your loans to closing quicker and easier than ever before.

Verify up to four years of previous income and receive your transcripts in 24 to 48 hours.

By interfacing directly with the IRS, Avantus customers can be confident that they are receiving their reports as soon as they are available; eliminating the time, expense and errors of manual processing.

Don't slow down your loans waiting on your tax return verifications. The Avantus IRS Direct TRV Service can help you make faster more informed loan decisions. Call us today to get started.
